

Letter of Recommendation

I had the pleasure of working with Kathryn at Compass Group for a few months. During this time, she consistently demonstrated exceptional attention to detail during the discovery phase of the design process. Her keen eye for product heuristics ensured a user-friendly and intuitive experience. Furthermore, she possesses a remarkable ability to ask insightful questions that effectively uncover and define project requirements.

Beyond her design skills, Kathryn excels in collaboration. Her willingness to work closely with both product and engineering teams, particularly in UX QA analysis, were invaluable. She was helpful in ensuring a high-quality product delivery.

She would be a valuable addition to any design team.
